-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 21 March 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed March 21, 2006 and March 28, 2006 have been fully considered but they are not persuasive. Applicant argues that Kannas fails to disclose calculating a reference service quality as an admissible service quality. Applicant further argues that Kannas fails to disclose denying access to the system but rather provides a lower level of service. The examiner, however, respectfully disagrees.

Kannas discloses a dynamic upgrade of quality of service in a packet switched network. Kannas further discloses calculating a reference service quality as evidenced by the fact that the system keeps track of the amount of users in the system. If the system is congested, access to the system won't be accepted. Although Kannas offers the mobile user a lower quality service, that service is not provided to the user if the resources are not available (col. 1, lines 48-56, col. 5, line 45-col. 6, line 23).

Based on the above remarks, the examiner believes Kannas still reads on the invention as presently claimed. The rejections to the claims are set forth below.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

Art Unit: 2617

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4, 6-15, 17-19 and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Kannas et al. (Kannas), U.S. Patent No. 6,683,853.

Regarding claims 1-4, 6-15, 17-19 and 21, Kannas discloses a method (and a mobile station and admission control device and program) of operating an admission control device in a mobile communication system capable of providing a first communication that guarantees a service quality and a second communication that does not guarantee the service quality at a mobile station, comprising: sending a required service quality required by an application from the mobile station to the admission control device when the mobile station sends a service request; the mobile station configured to request at least one of the first communication and the second communication, according to the type of the application, calculating, by the admission control device; a reference service quality as an admissible service quality. Said reference service being a service quality when a propagation quality is lowest at the mobile station; and admitting, by the admission control device, the service request from the mobile station if the required service quality is less than or equal to the reference service quality (col. 2, lines 24-59, col. 5, line 42-col. 6, line 23 and col. 6, lines 11- page 7, line 2).

***Conclusion***

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
